

Conserving the county's amphibians & reptiles

Berkshire Reptile & Amphibian Group

Frogs, toads, newts, snakes and lizards are becoming steadily rarer as a result of habitat loss, human interference and bad publicity.

Natrix natrix

B.R.A.G.'s aim is to try to help prevent the continuing decline of Berkshire's amphibians and reptiles, together with their habitats, by:

- Recording and monitoring amphibian and reptile populations around the county
- Safeguarding important sites
- Providing advice and information

We need your help!

We are currently involved in amphibian and reptile surveys at various sites around Berkshire, but to get a bigger picture we need details of your sightings.

What have you noticed in your back yard or whilst out walking? Have you seen:

- Frogs? }
- Toads? } (including spawn and tadpoles)
- Newts?
- Snakes?
- Lizards / Slow-worms?

If so then please let us know, providing the following details: **Which species; how many; location; date;** and any other **observations** that might have interested you.

Please send your sightings, or any amphibian or reptile queries you may have to:
